Iteration #2 Conclusion

Brought to you by Wu Tang financials

Review of the Project

For accutech , a business financial software company that recently merged with moneytree a personal financial advising company

We are designing a budgeting app that will allow people to get to a better financial situation

Recently converted to the flutter framework so that we could be deployable to both iOS and Android

Current Tech Stack

Dart

Flutter

Native Application

Plugins

- Pie Chart
- Steel Crypt
- Path Provider

What We Promised:

-   Conversion to flutter ✔️
-   Better budgeting logic ✔️
-   More fluid user experience ✔️
-   Transaction recording 🕛
-   Permanence 🕛

Meeting Notes

Overall positive reaction to our progress so far and our aspirations for the next iteration

Both Mr.Trammell and Mr.Wright were able to attend the meeting

Plans for Meeting with there people for information on how to implement account aggregation

The plan for #3

- Refactoring backend
- Refactoring UI
- Implement permanence and transaction recording library
- Location services
- Research into account aggregation

Demo times
